

Read-Live.Me User Guide

1. Overview

Read-Live.Me is a centralized AI translation service designed to translate a single voice input into multiple languages for a large audience. The service, available at Read-Live.Me, is designed to keep every attendee in the loop.

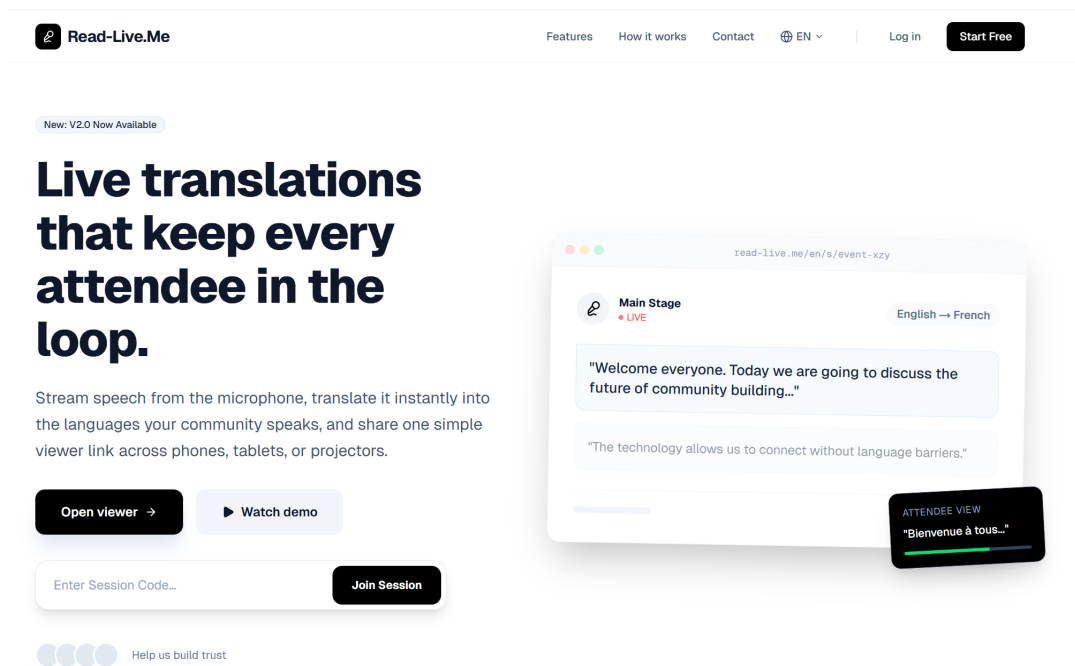

The ecosystem consists of three main components:

- **Microphone Host:** Manages the session, including recording and settings.
- **Audience View (Smartphone):** Optimized for individual attendees to read live translations in their selected language.
- **Big Screen View:** Displays multiple simultaneous translations on a single screen, designed for smart TVs and projectors.

The application supports Arabic, Bosnian, German, English, French, and Turkish.

The Home Page

The home page provides a general overview of the application. From here, users can join a session, log in as a host, or create a new account.

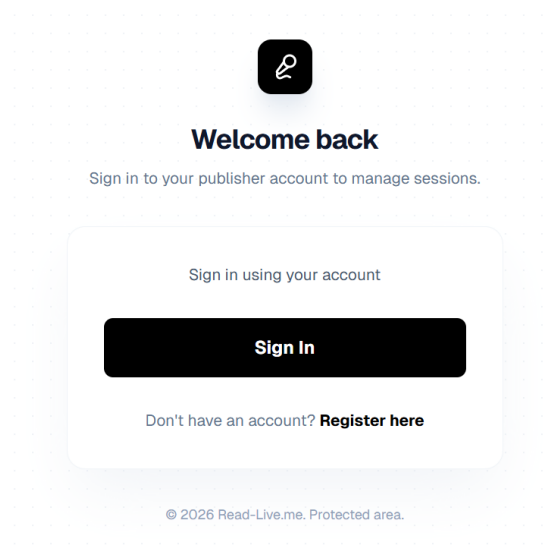

For further assistance, users can view instructions at read-live.me/en/how-it-works or access the contact form via the home page or read-live.me/en#contact.

2. Getting Started

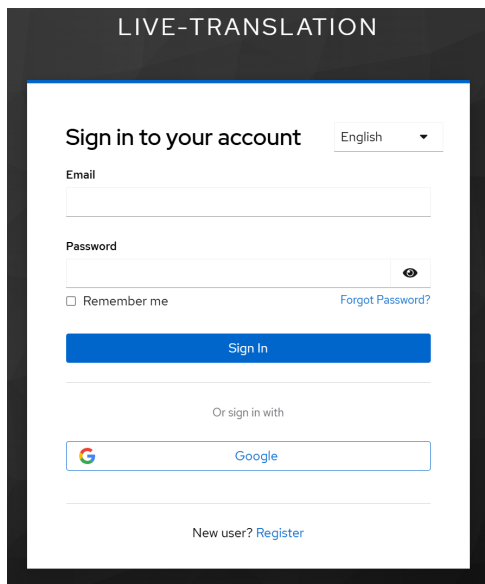

Registration & Access

To use the platform as a host, you must create a publisher account.

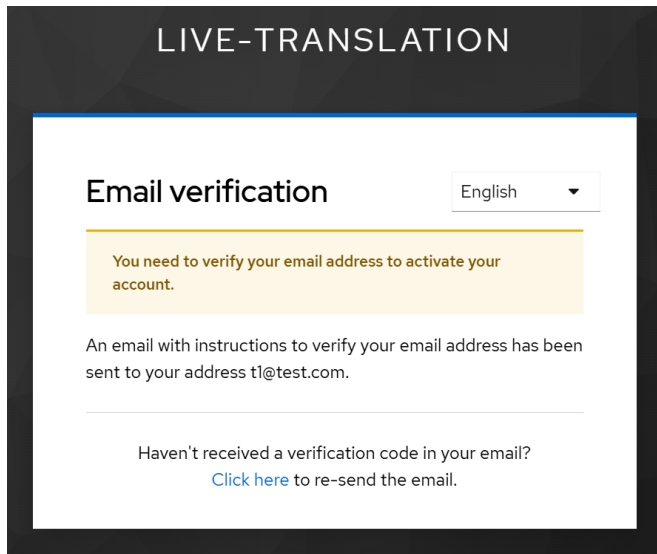

1. **Sign Up:** If you do not have an account, navigate to the "Start Free" or Login page and click "**Register here**".

2. **Authentication:** You will be directed to the Identity Provider page. You may log in using a Gmail account or create a new account by clicking "New User? Register".

3. **Email Verification:** If creating a new email account, you must verify your email address to activate the account.

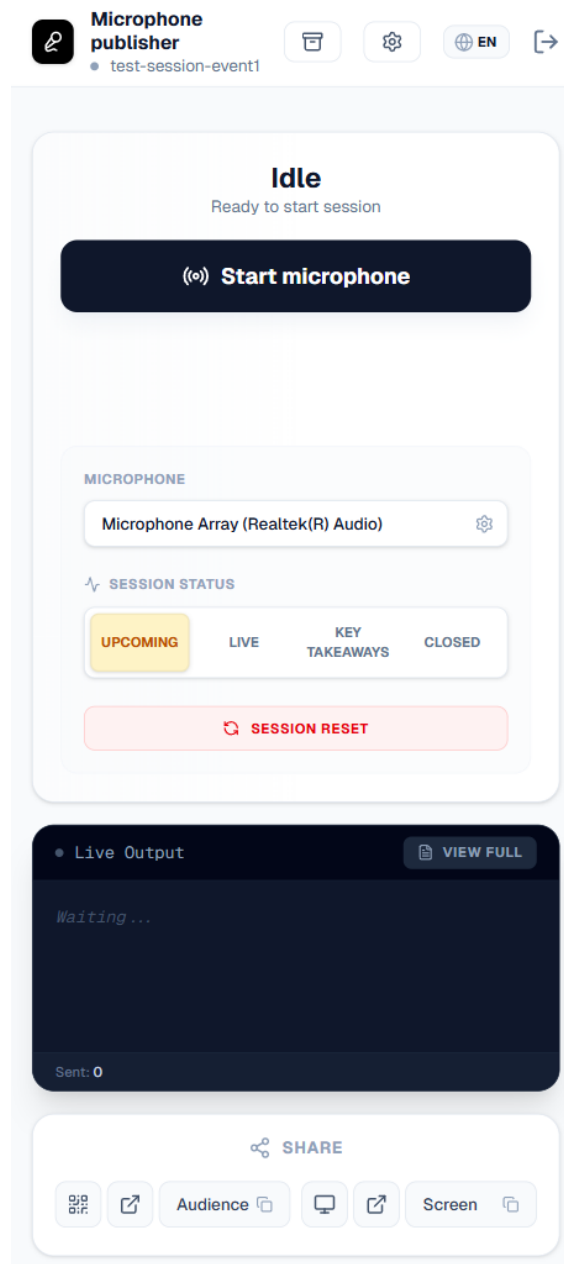

4. **Admin Approval:** After verification, you will be redirected to the "Pending Approval" page.
- You must submit a reason for requesting access.
 - Once an administrator approves your request, you will be added to your organization group and assigned a unique session prefix code.

A screenshot of a web page titled "Account Pending Approval" with a warning icon at the top. The text says: "Thank you for signing in. Your account is currently under review. You need the `approved_host` role to access the publisher dashboard." Below this, it says: "Please contact an administrator to request access." There is a section titled "Request Access / Provide Details" with input fields for "Name" (Muhammed Smajevic) and "Email" (t1@test.com). Below these is a "Reason for access" field with the text: "My account is pending approval. I would like to request access." At the bottom, there is a "Submit Request" button with a right arrow icon. A success message "Success!" with a green checkmark and the Cloudflare logo is visible above the button. At the very bottom, there is a "Logout" link.

3. Host Guide: Managing a Session

Once approved as a session host, you will gain access to the **Microphone Dashboard**. This interface is optimized for simplicity and control.

Dashboard Layout

- **Header:** Displays the session name, archived sessions, settings, language options, and logout.

- **Central Controls:** Contains the Start/Stop Microphone button, microphone settings, and session status indicators.
- **Session Reset:** Instantly wipes current session translations from all smartphone viewers and large screens.

Session Setup

Before going live, configure your session settings via the dashboard:

- **Session Code:** Configure your custom code. This combines your unique organization prefix with a custom suffix (e.g., `test-session-` + `event1` becomes `test-session-event1`).

 • test-session-event1

Soniox Best Practices

- **Multiple Languages:** Selecting 2-3 languages improves accuracy for mixed-language speech.
- **Silence Detection:** Now fully automatic. No manual VAD settings required.
- **Topic Context:** Provide a Topic (e.g. 'Medical') to help the AI recognize specialized terms.
- **High Quality:** Keep the microphone close to the speaker and minimize background noise.

SESSION RESET

- **Input Language:** Select the primary language of the speaker.
 - You may select multiple languages or set this to **"Auto"** if the language is unknown.
 - *Pro Tip:* To improve transcription quality, add specific terms or keywords in the **Topic/Context** field.
- **Target Languages:** Select up to 6 distinct languages for translation output.

Broadcasting Live

- **Start/Stop:** Click **Start Microphone** to begin broadcasting translations.
- **Live Output:** You can view a real-time transcription of the raw speech in the "Live Output" panel.
 - *Note:* To ensure the highest translation quality, text is generated and broadcast only after a full sentence is transcribed.

Session Status Indicators

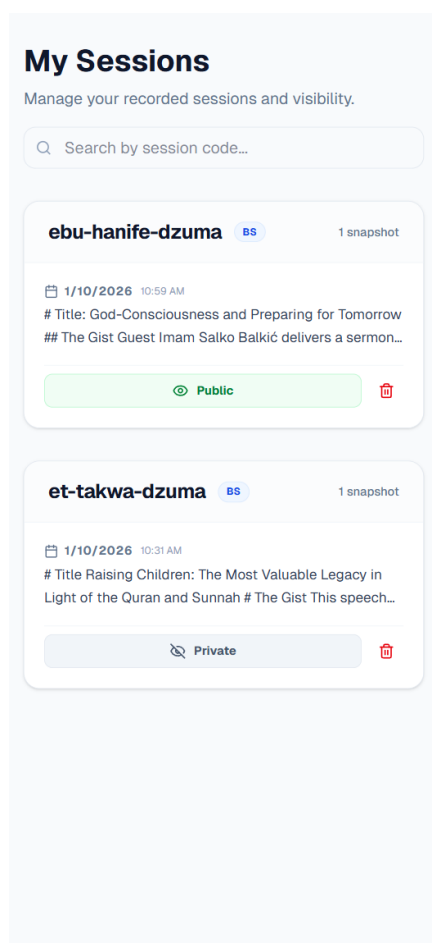

The dashboard displays the current state of your event:

- **Upcoming:** The session is ready but has not started.
- **Live:** The session is currently broadcasting.
- **Key Takeaways:** The session has ended, and the AI is generating a summary.
- **Closed:** The session is fully closed.

Post-Session & Archives

Once a session is over, changing the status to **"Key Takeaways"** triggers the generation of an AI summary and archives the session.

- **Visibility:** Archived sessions are **Private** by default.
- **Public Sharing:** The owner can toggle an archive to **Public**, making it viewable at read-live.me/en/archived-sessions for friends, family, or colleagues.

Naslov

Pouke Miradža: Namaz kao direktna veza sa Allahom

Suština

Govor se osvrće na blagoslovljenu noć Lejletul-Miradža kao utjehu Poslaniku a.s. nakon teških iskušenja i gubitaka. Fokus je na propisivanju pet dnevnih namaza kao najvećeg dara ovog nebeskog putovanja, koji služi kao duhovno uzdizanje vjernika i jedinstveno sredstvo za čišćenje duše i bliskost sa Gospodarom.

Ključne poruke

- Utjeha nakon iskušenja:** Miradž se desio kao nagrada i ohrabrenje Poslaniku a.s. nakon godine tuge, gubitka zaštitnika (Ebu Taliba i Hatidže r.a.) i bojkota.
- Naređivanje namaza:** Namaz je jedini propis naređen direktno na nebesima tokom Miradža (prvobitno 50, smanjeno na 5 sa istom nagradom).

koji je pao u nesvijest od djelica Božanskog svjetla, vjerniku se na sedždi uklanjaju svi zastori između njega i Gospodara.

- Stub vjere:** Namaz je temelj vjere i prvo za šta će čovjek polagati račun na Sudnjem danu.
- Čišćenje duše:** Pet dnevnih namaza čisti dušu od grijeha baš kao što kupanje u rijeci pet puta dnevno čisti tijelo.
- Put uspjeha:** Uspio je onaj ko očisti svoju dušu onako kako je to Allah propisao – kroz namaz.
- Važnost učenja:** Govor se zaključuje podsjećanjem na imperativ "Uči" (Ikre) i važnost stjecanja znanja u džematu.

Pamtljivi citati

"Namaz je Miradž vjernika... Nema nijedne koprene ni zastora između nas kao robova i Uzvišenog Allaha dželešanuhu prilikom sedžde."

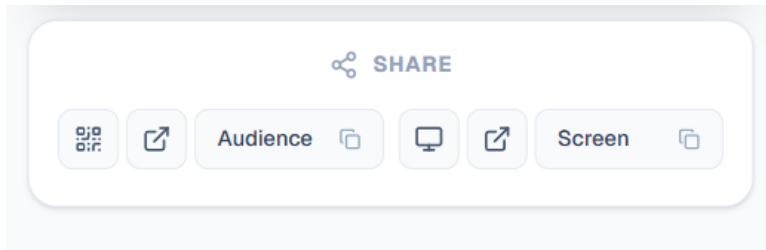

Transcription

Draga i poštovana braćo, kao i uvijek, sva hvala i zahvala pripada svemogućem Allahu dželešanuhu, na svim blagodatima koje nam je podario. Posebno njemu jedinome zahvaljujemo na najvećoj blagodati, to jest uputi Kur'an-i Kerimu, kelamullahu, Allahovom govoru, bez kojeg bi naš život bio obično lutanje i nagađanje pravoga puta. Neka je salavat i selam na poslanik poslanika Muhammeda صلى الله عليه وسلم. Njegovu časnu porodicu,

4. Sharing & Viewing

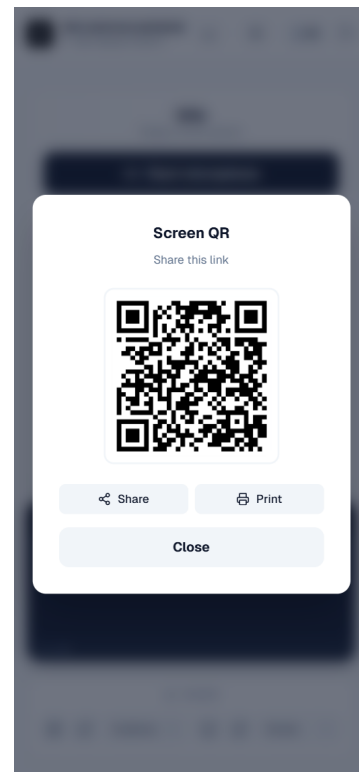

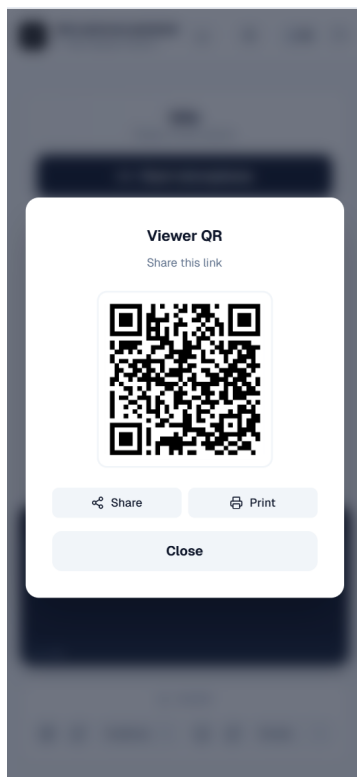

Hosts can share access via the **Share** menu, which provides specific options for Audience (mobile) or Screen (display).

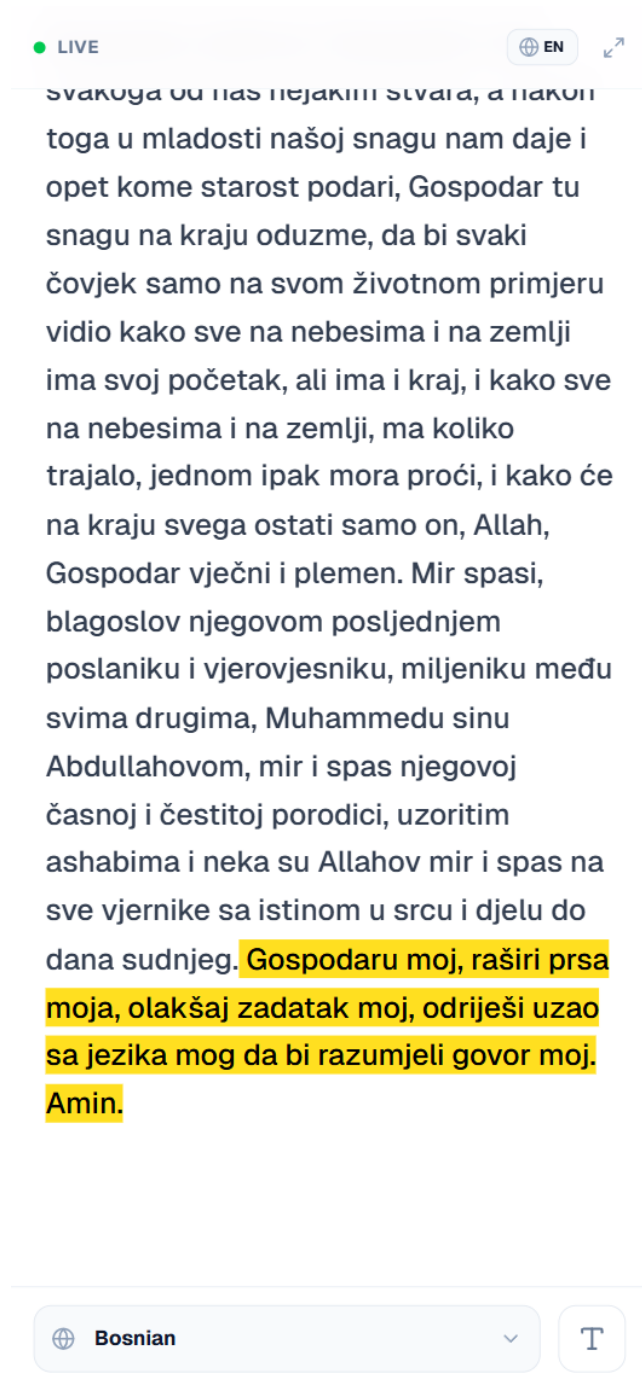

Audience View (Smartphones)

Attendees can follow the presentation on their personal devices.

- **How to Join:** Attendees can scan the session QR code or enter the session code manually on the home page.
- **Experience:** Users select their preferred language and read the live translation in real-time.

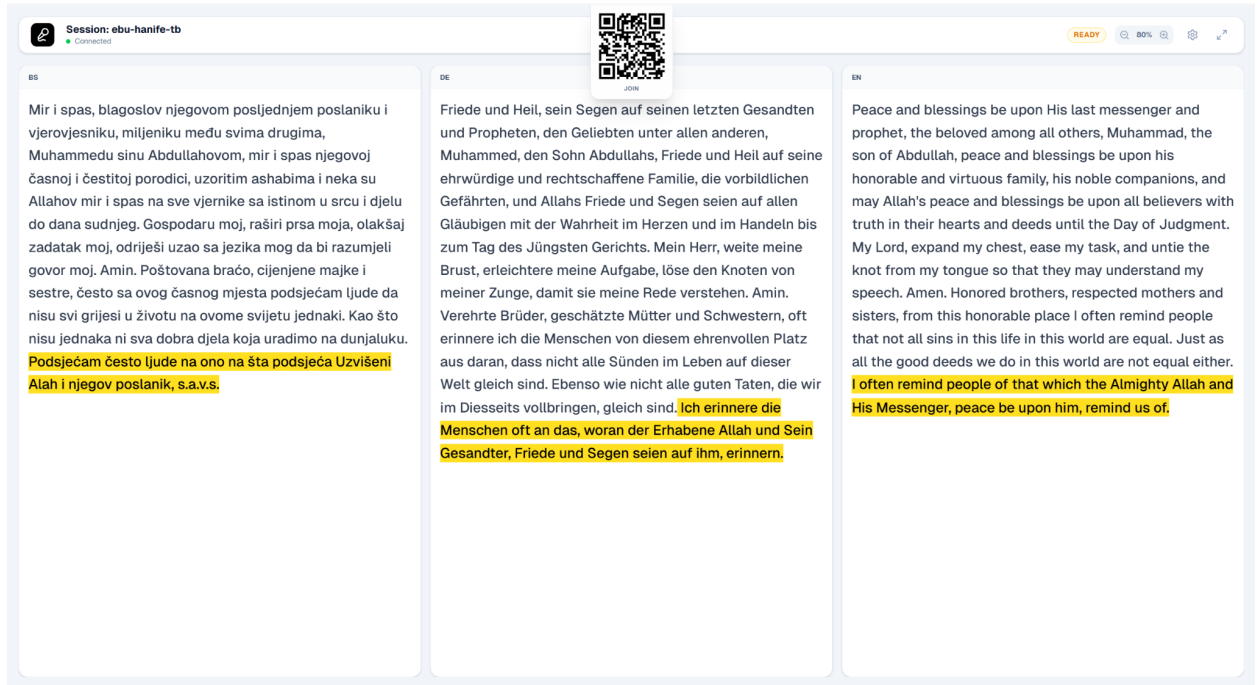

Live translation smartphone view image

Big Screen View (Projectors/TVs)

Optimized for large venues, this view allows for communal reading.

- **Multi-Language:** Display multiple translation streams simultaneously side-by-side.

- **Display Settings:** Settings are stored locally on the device. Configuration options include:
 - **Text Zoom:** Adjust font size for better visibility.
 - **Visible Languages:** Toggle which languages are displayed.
 - **QR Code:** Toggle the visibility of the "Join" QR code for the audience.
